

INSTALLATION INSTRUCTIONS

TOOLS NEEDED:

DO NOT USE:

1. Turn off water supply. Flush toilet to drain tank.
2. Disconnect old flapper chain from tank lever arm and flapper.
3. Attach "C" clip end of new chain to flapper, tighten clip if necessary.
4. Connect long clip side of chain to hole in tank lever arm that provides the best lift. Chain should have slight slack when in closed position. Turn on water supply and check flush.

If a new flapper is needed, use Fluidmaster Model 500, 501, 502, 503, 504 or 555C.
