

FLUIDMASTER® 7510 STANDARD WAX RING INSTALLATION INSTRUCTIONS

INSTALLATION INSTRUCTIONS:

- Be sure wax gasket is at least 70°F temperature to insure proper flow of wax.
- Press wax gasket over horn outlet of toilet bowl, extending plastic flange away from the bowl.
- Set bowl in place and use body weight to compress wax gasket.
- Twist bowl slightly to spread wax.
- Tighten bolts (not included) carefully to prevent breaking the bowl.
