San Juan Capistrano, CA and Seattle, WA (April 30, 2015) — The world's leading provider of toilet repair components and systems is joining forces with one of the largest nongovernmental organizations providing clean water and undertaking other humanitarian efforts on behalf of children, families and their communities around the world, including within the United States.

Fluidmaster, the #1 Toilet Repair Brand Worldwide, is providing thousands of some of its best selling All-in-One[™] repair kits and water supply connectors to World Vision for use in both their direct relief efforts within the United States and as product offerings in World Vision Storehouse locations in Chicago IL, Seattle WA, Dallas TX and Philippi WV.

"We at Fluidmaster have been impressed with World Vision for its global efforts during natural disasters and humanitarian work in aiding the poor and sick," said Todd Talbot, President of Fluidmaster. "In particular, we're pleased to assist with some of their more local efforts within some of the hardest hit areas of the United States."

"One of our Founder's Goals set forth in 1960 was to 'Be a Good Citizen in the Community' and these efforts with World Vision allow us to contribute our own products to a worthwhile cause," said John Wohlfiel, Fluidmaster VP of Human Resources. Employees have also mounted an internal company campaign to assist World Vision relief efforts tied to the Nepali earthquake.

"We greatly appreciate the donations from Fluidmaster and our other terrific corporate sponsors, large and small, to help fund our efforts to tackle the causes of poverty and injustice," said Larry Noble, National Director-Corporate Engagement of World Vision.
