Fluidmaster: The Global Solution

The Legacy Continues...

A True Leader in the Industry

Fluidmaster, the leading global supplier of fluid management solutions, is found in more toilets than all other brands combined. As the customer's first choice and preferred supplier of toilet tank trim, we have been ingeniously engineering the internal flushing mechanisms of toilets for more than half a century. Built on and inspired by an unsurpassed history of innovation, Fluidmaster has become an icon in the plumbing industry. Our reputation for superior quality continues to grow as we cultivate and support partnerships around the world with retailers, wholesalers and toilet manufacturers, reaffirming the company as a leader in innovation and global supply of sanitaryware products.

Pioneering Innovation for More Than 60 Years

Our company's success began with the desire and drive of founder Adolf Schoepe. Convinced that existing toilet technology was inefficient and unreliable, he sought to create a more advanced fill valve that worked with, rather than against, water pressure. Mr. Schoepe's vision became a reality when he revolutionized the toilet care industry by successfully launching Fluidmaster's innovative pilot fill valve technology in 1957.

Comprehensive Line of Innovative Toilet Repair Products

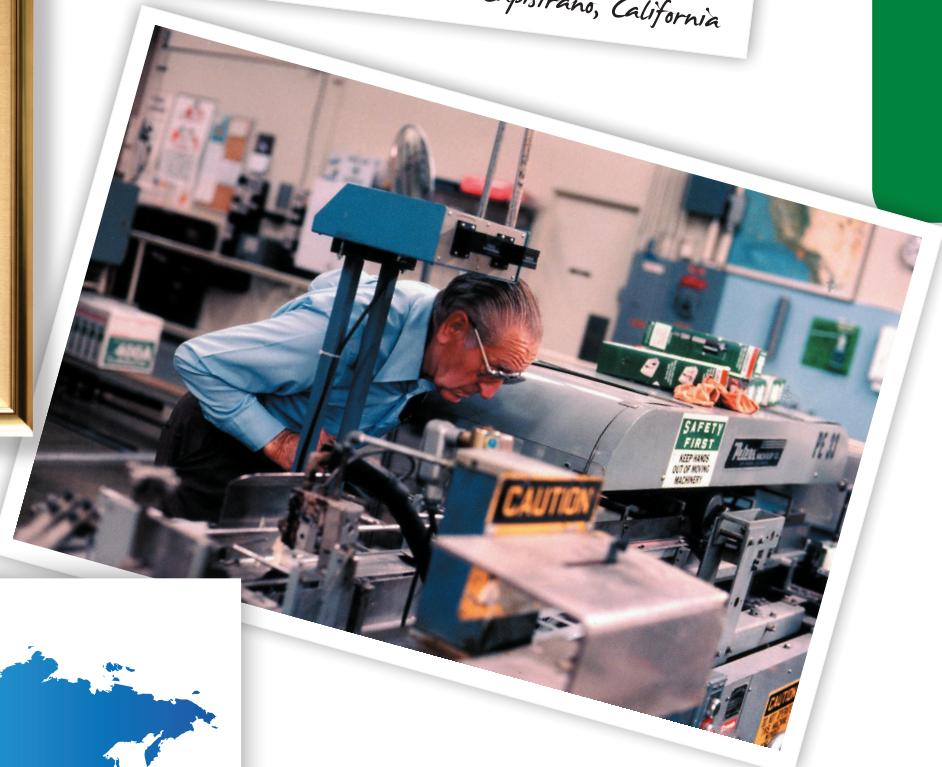

The popularity of Fluidmaster fill valves has supported our expansion into related product lines through the years. Today, Fluidmaster markets more than 67 million toilet repair products annually and sells more toilet tank replacement valves than any other manufacturer in the world. In addition to the inaugural fill valve, our complete line of toilet repair parts includes flush valves, flappers, tank levers, dual flush valves, bowl wax, toilet repair kits and water supply connectors. Fluidmaster's growing global distribution network reaches more than 80% of the world's population and spans over 87 countries. With manufacturing facilities across the globe, Fluidmaster is quick to market, quick to manufacture and quick to deliver with unparalleled quality.

FILL VALVES

The fill valve fills the toilet tank with water from the supply line after it has been emptied by a flush.

It replaces the ballcock and is more efficient and easy to install.

ALL Fluidmaster® fill valves include the following features and benefits:

- Universal fit
- Anti-siphon
- Won't contaminate fresh water supply
- Easy to install
- Code approved
